

## INTERIM GUIDANCE FOR RETAIL RENTAL, REPAIR, AND CLEANING ACTIVITIES DURING THE COVID-19 PUBLIC HEALTH EMERGENCY

### When you have read this document, you can affirm at the bottom.

As of July 1, 2020

### **Purpose**

This Interim Guidance for Retail Rental, Repair, and Cleaning Activities during the COVID-19 Public Health Emergency (“Interim COVID-19 Guidance for Retail Rental, Repair, and Cleaning Activities”) was created to provide owners/operators of retail rental, repair, and cleaning businesses and their employees and contractors with precautions to help protect against the spread of COVID-19 as retail rental, repair, and cleaning businesses continue to operate or reopen.

This guidance applies only to retail rental, repair, and cleaning businesses such as electronics repair, equipment rental, clothing rental, laundromats, other clothing/fabric cleaning services, and residential cleaning services. This guidance does not apply to retail hair services such as hair salons or barbershops; general retailers such as book stores, grocery stores, or clothing stores; or businesses involved in the buying, selling, leasing or rental of motor vehicles. Retail businesses currently operating with curbside and in-store pick up should continue to do so to the extent possible. For information on how to safely conduct these services, refer to the State’s “Interim COVID-19 Guidance for Curbside and In-Store Pickup Retail Business Activities.”

These guidelines are minimum requirements only and any employer is free to provide additional precautions or increased restrictions. These guidelines are based on the best-known public health practices at the time of Phase II of the State’s reopening, and the documentation upon which these guidelines are based can and does change frequently. The Responsible Parties – as defined below – are accountable for adhering to all local, state, and federal requirements relative to retail rental, repair, and cleaning business activities. The Responsible Parties are also accountable for staying current with any updates to these requirements, as well as incorporating same into any retail business activities and/or Site Safety Plan.

### **Background**

On March 7, 2020, Governor Andrew M. Cuomo issued Executive Order 202, declaring a state of emergency in response to COVID-19. Community transmission of COVID-19 has occurred throughout New York. To minimize further spread, social distancing of at least six feet must be maintained between individuals, where possible.

On March 20, 2020, Governor Cuomo issued Executive Order 202.6, directing all non-essential businesses to close in-office personnel functions. Essential businesses, as defined by Empire State Development Corporation (ESD) guidance, were not subject to the in-person restriction, but were, however, directed to comply with the guidance and directives for maintaining a clean and safe work environment issued by the New York State Department of Health (DOH), and were strongly urged to maintain social distancing measures to the extent possible.

On April 12, 2020, Governor Cuomo issued [Executive Order 202.16](#), directing essential businesses to provide employees, who are present in the workplace, with a face covering, at no-cost, that must be used when in direct contact with customers or members of the public during the course of their work. On April 15, 2020, Governor Cuomo issued [Executive Order 202.17](#), directing that any individual who is over age two and able to medically tolerate a face-covering must cover their nose and mouth with a mask or cloth face-covering when in a public place and unable to maintain, or when not maintaining, social distance. On April 16, 2020, Governor Cuomo issued [Executive Order 202.18](#), directing that everyone using public or private transportation carriers or other for-hire vehicles, who is over age two and able to medically tolerate a face covering, must wear a mask or face covering over the nose and mouth during any such trip. It also directed any operators or drivers of public or private transport to wear a face covering or mask which covers the nose and mouth while there are any passengers in such a vehicle. On May 29, 2020, Governor Cuomo issued [Executive Order 202.34](#), authorizing business operators/owners with the discretion to deny admittance to individuals who fail to comply with the face covering or mask requirements.

On April 26, 2020, Governor Cuomo [announced](#) a phased approach to reopen industries and businesses in New York in phases based upon a data-driven, regional analysis. On May 4, 2020, the Governor [provided](#) that the regional analysis would consider several public health factors, including new COVID-19 infections, as well as health care system, diagnostic testing, and contact tracing capacity. On May 11, 2020, Governor Cuomo [announced](#) that the first phase of reopening would begin on May 15, 2020 in several regions of New York, based upon available regional metrics and indicators. On May 29, 2020, Governor Cuomo [announced](#) that the second phase of reopening would begin in several regions of the state, and announced the use of a new early warning dashboard that aggregates the state's expansive data collection efforts for New Yorkers, government officials, and experts to monitor and review how the virus is being contained to ensure a safe reopening.

In addition to the following standards, both essential and non-essential businesses must continue to comply with the guidance and directives for maintaining clean and safe work environments issued by DOH.

Please note that where guidance in this document differs from other guidance documents issued by New York State, the more recent guidance shall apply.

## **Standards for Responsible Retail Rental, Repair, and Cleaning Service Activities in New York State**

No retail rental, repair, and cleaning service activity can occur without meeting the following minimum State standards, as well as applicable federal requirements, including but not limited to such minimum standards of the Americans with Disabilities Act (ADA), Centers for Disease Control and Prevention (CDC), Environmental Protection Agency (EPA), and United States Department of Labor's Occupational Safety and Health Administration (OSHA).

The State standards contained within this guidance apply to all retail rental, repair, and cleaning service activities – both essential and non-essential – in operation during the COVID-19 public health emergency until rescinded or amended by the State. The proprietor/operator of the retail rental, repair, or cleaning business, or another party as may be designated by the proprietor/operator (in either case, "the Responsible Parties"), shall be responsible for meeting these standards.

The following guidance is organized around three distinct categories: people, places, and processes.

# I. PEOPLE

## A. Physical Distancing

- Responsible Parties must ensure that for any retail rental, repair, and cleaning activity, the workforce and customer presence is limited to no more than 50% of the maximum occupancy for a particular area as set by the certificate of occupancy, inclusive of customers, who must maintain six feet of separation from others and, in all cases, must only be permitted entry into a store if they wear an acceptable face covering; provided, however, that the customer is over the age of two and able to medically tolerate such covering. Employees also must wear face coverings any time they interact with customers (e.g. ringing up a purchase, wrapping an item to hand off), even if they are six or more feet apart; and
- Responsible Parties must ensure a distance of at least six feet is maintained among employees and customers at all times, unless the safety of the core activity requires a shorter distance (e.g. operating cash registers, moving and lifting equipment). Employees must wear acceptable face coverings any time they interact with customers (e.g. ringing up a purchase, wrapping an item to hand off) and any time employees are within six feet of another person. Employees must be prepared to don a face covering if another person unexpectedly comes within six feet.
  - Acceptable face coverings for COVID-19 include but are not limited to cloth-based face coverings and disposable masks that cover both the mouth and nose.
  - However, cloth, disposable, or other homemade face coverings are not acceptable face coverings for workplace activities that typically require a higher degree of protection for personal protective equipment (PPE) due to the nature of the work. For those activities, N95 respirators or other PPE used under existing industry standards should continue to be used, as is defined in accordance with [OSHA guidelines](#).
- Responsible Parties may modify the use and/or restrict the number of work stations and employee seating areas, so that employees are at least six feet apart in all directions (e.g. side-to-side and when facing one another) and are not sharing workstations without cleaning and disinfection between use. When distancing is not feasible between workstations, Responsible Parties must provide and require the use of face coverings or physical barriers such as plastic shielding walls, in lieu of face coverings in areas where they would not affect air flow, heating, cooling, or ventilation.
  - If used, physical barriers should be put in place in accordance with [OSHA guidelines](#).
  - Physical barrier options may include: strip curtains, plexiglass or similar materials, or other impermeable dividers or partitions.
- Responsible Parties are encouraged to modify retail layouts so that employees and customers are at least six feet apart in all directions when employees are working and customers are browsing, unless physical barriers are in place (e.g. Plexiglass or partitions at cash registers).
  - Responsible Parties must require that employees use cloth face masks when interacting with customers. Responsible Parties shall not permit customers into the store without a face covering, if medically able to tolerate one, and are over age two.
  - Responsible Parties must reserve adequate space for employees and customers to work and shop, considering appropriate social distancing; Responsible Parties should consider creating one-way aisles, otherwise rearranging traffic flow, or using alternating cash registers.

- Responsible Parties must prohibit the use of small spaces (e.g. behind cash registers, elevators, stock rooms) by more than one individual at a time, unless all individuals in such spaces at the same time are wearing acceptable face coverings. However, occupancy must never exceed 50% of the maximum capacity of the space, unless it is designed for use by a single occupant. Responsible Parties should increase ventilation with outdoor air to the greatest extent possible (e.g. opening windows, leaving doors open), while maintaining safety protocols.
- Responsible Parties should encourage the use of touchless payment or pay ahead options, when available. Minimize handling cash, credit cards, reward cards, and mobile devices, where possible.
- Responsible Parties should put in place measures to reduce bi-directional foot traffic using tape or signs with arrows in narrow aisles, hallways, or spaces, and post signage and distance markers denoting spaces of six feet in all commonly used areas and any areas in which lines are commonly formed or people may congregate (e.g. clock in/out stations, health screening stations, break rooms, cash register areas).
  - Where possible, place markers or barriers to encourage one directional traffic.
- Responsible Parties must post signage and distance markers denoting spaces of six feet in all commonly used areas and any areas in which lines are commonly formed or people may congregate (e.g. clock in/out stations, health screening stations, break rooms, cash register areas, near merchandise, in aisles).
- Responsible Parties should encourage customer visits for services (e.g. computer repair, dry cleaning) be made by appointment only, where practicable.
- Responsible Parties should consider closing waiting rooms. To the extent possible, customers should be asked to wait in cars or outside the location at least six feet away from each other until they can enter the shop while maintaining social distance. To ensure that individuals waiting to enter the shop maintain six feet of social distance from each other, Responsible Parties should post signage and floor distance markers denoting spaces of six feet outside of the shop which delineate acceptable locations and distances for customers to stand.
- Responsible Parties must post signs inside and outside of the retail location, consistent with DOH COVID-19 signage. Responsible Parties can develop their own customized signage specific to their workplace or setting, provided that such signage is consistent with the Department's signage. Signage should be used to remind employees and customers to:
  - Cover their nose and mouth with a face covering.
  - Properly store and, when necessary, discard PPE.
  - Adhere to physical distancing instructions.
  - Report symptoms of or exposure to COVID-19, and how they should do so.
  - Follow hand hygiene and cleaning guidelines.
  - Follow appropriate respiratory hygiene and cough etiquette.

## **B. Gatherings in Enclosed Spaces**

- Responsible Parties must limit in-person employee gatherings (e.g. employee meetings, break rooms, stock rooms) to the greatest extent possible and use other methods such as video or teleconferencing whenever possible, per CDC guidance "[Interim Guidance for Businesses and Employers to Plan and Respond to Coronavirus Disease 2019 \(COVID-19\)](#)". When videoconferencing or teleconferencing is not possible, Responsible Parties should hold meetings in open, well-ventilated spaces and ensure that individuals maintain six feet of social distance between one another (e.g. if there are chairs, leave space between chairs, have employees sit in alternating chairs).
- Responsible Parties must put in place practices for adequate social distancing in small areas, such as restrooms and breakrooms, and should develop signage and systems (e.g. flagging when occupied) to restrict occupancy when social distancing cannot be maintained in such areas; and
- Responsible Parties should stagger schedules for employees to observe social distancing (i.e. six feet of space) for any gathering (e.g. while taking breaks).

### C. Workplace Activity

- Responsible Parties must take measures to reduce interpersonal contact and congregation, through methods such as:
  - limiting in-person presence to only those staff who are necessary to be on site;
  - adjusting workplace hours;
  - reducing on-site workforce to accommodate social distancing guidelines;
  - shifting design (e.g. A/B teams, staggered arrival/departure times);
  - batching activities, where possible, so employees can adhere to social distancing and reduce the number of hands touching at the same time (e.g. one employee at a time does cleaning of all returned equipment; one employee provides cleaning services for one room, while another employee cleans a different room); and/or
  - for pickup or returns of equipment (e.g. repaired equipment), provide customers with time estimates for pickup to avoid customers waiting at the retail or service location.
- Responsible Parties should adjust retail hours as necessary to reduce density and enable enhanced cleaning and disinfection procedures.
- For businesses providing in-home or on-site services (e.g. cleaning, repairs, at-home or on-site sales.), Responsible Parties should provide windows for service time and encourage customers to wear masks and adhere to social distancing guidelines.
  - Responsible Parties should encourage employees and customers to conduct retail transactions outdoors where possible.

### D. Movement and Commerce

- Responsible Parties must monitor and control the flow of traffic into the establishment to ensure adherence to maximum capacity requirements.
- Responsible Parties must establish designated areas for pickups and deliveries, limiting contact to the extent possible.
- Responsible Parties should provide clearly designated, separate entrances and exits, where possible.

- Responsible Parties must be prepared to queue customers outside while still maintaining physical distance including through the use of visual cues.
- For merchandise (e.g. parts, cleaning equipment) deliveries, Responsible Parties should implement a touchless delivery system whereby drivers stay in the cab of the vehicle while delivery takes place or, where not practicable, Responsible Parties must provide acceptable PPE appropriate to the anticipated activities that includes, at a minimum, a cloth face covering to delivery personnel at no cost for the duration of the delivery process.
- Responsible Parties must ensure employees sanitize hands before and after transferring a load (e.g. from a delivery driver) of merchandise (e.g. sanitize hands before starting to load items; and once all items have been loaded, finish by sanitizing their hands again).
- In addition to utilizing curbside and in-store pick up to the extent possible, Responsible Parties should provide remote shopping alternatives for customers, including click-and-collect, delivery, and pick-up to limit customers in the establishment.
- Responsible Parties must ensure that fitting rooms are equipped with appropriate cleaning and hygiene supplies for employee and customer use, including hand sanitizer; and strongly encouraged to clean and disinfect fitting rooms after each customer's use.
- Responsible Parties must close amenities, where applicable, including:
  - self-serve bars and samplers;
  - water fountains; and
  - magazine areas.
- For any activities related to food services, Responsible Parties must operate in accordance with "Interim Guidance for Food Services during the COVID-19 Public Health Emergency."

## II. PLACES

### A. Protective Equipment

- Responsible Parties must ensure employees wear face coverings when they are within six feet of customers or coworkers. Employees also must wear face coverings any time they interact with customers (e.g. ringing up a purchase, wrapping an item to hand off), even if they are six or more feet apart.
- Responsible Parties must ensure that customers are only permitted entry into the retail store if they wear an acceptable face covering; provided, however, that the customer is over the age of two and able to medically tolerate such covering.
- In addition to necessary PPE as required for certain workplace activities, Responsible Parties must procure, fashion, or otherwise obtain acceptable face coverings and provide such coverings to their employees while at work at no cost to the employee. Responsible Parties should have an adequate supply of face coverings, masks and other required PPE on hand should an employee need a replacement or should an essential visitor be in need. Acceptable face coverings include, but are not limited to, cloth (e.g. homemade sewn, quick cut, bandana), surgical masks, N95 respirators, and face shields.

- Face coverings must be cleaned or replaced after use and may not be shared. Please consult CDC [guidance](#) for additional information on cloth face coverings and other types of PPE, as well as instructions on use and cleaning.
  - Note that cloth face coverings or disposable masks shall not be considered acceptable face coverings for workplace activities that require a higher degree of protection for face covering requirements. For example, if N95 respirators are traditionally required for specific cleaning activities, a cloth or homemade mask would not suffice. Responsible Parties must adhere to OSHA standards for such safety equipment.
- Responsible Parties must allow employees to use their own acceptable face coverings but cannot require employees to supply their own face coverings. Further, this guidance shall not prevent employees from wearing their personally owned additional protective coverings (e.g. surgical masks, N95 respirators, or face shields), or if the Responsible Parties otherwise requires employees to wear more protective PPE due to the nature of their work. Employers should comply with all applicable OSHA standards.
- Responsible Parties must put in place measures to limit the sharing of objects, such as objects, tools, registers, and vehicles, as well as the touching of shared surfaces; or, require employees to wear gloves (trade-appropriate or medical) when in contact with shared objects or frequently touched surfaces; or, require employees to sanitize or wash their hands before and after contact.
- Responsible Parties must train employees on how to adequately don, doff, clean (as applicable), and discard PPE, including but not limited to, appropriate face coverings.
- For businesses performing in-home or on-site services (e.g. home appliance repairs, in-home cleaning services, at-home or on-site sales), Responsible Parties must require employees to wear face coverings when within six feet of a customer. Customers and employees are encouraged to wear face coverings at all times when in an enclosed space.
  - For cleaning services (e.g. residential cleaning), employees should also wear disposable gloves.
- Responsible Parties should minimize the need for employees to travel in shared vehicles.
  - If a vehicle contains more than one employee, all employees in the vehicle must wear face coverings.

## **B. Hygiene, Cleaning, and Disinfection**

- Responsible Parties must ensure adherence to hygiene and sanitation requirements as advised by the CDC and DOH, including "[Guidance for Cleaning and Disinfection of Public and Private Facilities for COVID-19](#)," and the "[STOP THE SPREAD](#)" poster, as applicable. Responsible Parties must maintain logs that include the date, time, and scope of cleaning and disinfection.
- Responsible Parties must provide and maintain hand hygiene stations on site, as follows:
  - For handwashing: soap, running warm water, and disposable paper towels.
  - For sanitizer: an alcohol-based hand sanitizer containing at least 60% alcohol for areas where handwashing facilities may not be available or practical.
  - Responsible Parties must make hand sanitizer available throughout the store for use by employees and customers; it should be placed in convenient locations such as points of entrance for customers and at cash registers or payment terminals.

- Responsible Parties should place signage near hand sanitizer stations indicating that visibly soiled hands should be washed with soap and water; hand sanitizer is not effective on visibly soiled hands.
- Responsible Parties should place receptacles around the location for disposal of soiled items, including PPE.
- Responsible Parties must provide appropriate cleaning and disinfection supplies for shared and frequently touched surfaces and encourage employees to use these supplies, following manufacturers' instructions, before and after use of these surfaces, followed by hand hygiene.
- Responsible Parties must conduct regular cleaning and disinfection of the retail location and more frequent cleaning and disinfection for high risk areas used by many individuals and for frequently touched surfaces. Cleaning and disinfection must be rigorous and ongoing and should occur at least after each shift, daily, or more frequently as needed. Please refer to DOH's "[Interim Guidance for Cleaning and Disinfection of Public and Private Facilities for COVID-19](#)" for detailed instructions on how to clean and disinfect facilities.
  - Responsible Parties must ensure regular cleaning and disinfection of restrooms. Restrooms should be cleaned and disinfected more often depending on frequency of use.
    - Responsible Parties must ensure distancing rules are adhered to by reducing restroom capacity where feasible.
  - Responsible Parties must ensure that equipment is regularly disinfected using registered disinfectants, including at least as often as employees change workstations. Refer to the Department of Environmental Conservation (DEC) [list of products](#) registered in New York State identified by the EPA as effective against COVID-19.
  - If cleaning or disinfection products or the act of cleaning and disinfection causes safety hazards or degrades the material or equipment, Responsible Parties must put in place hand hygiene stations between use and/or supply disposable gloves and/or limitations on the number of employees using such equipment.
- Responsible Parties must provide for the cleaning and disinfection of exposed areas in the event of a positive case of COVID-19 of an employee or customer, with such cleaning and disinfection to include, at a minimum, all heavy transit areas and high-touch surfaces (e.g. vending machines, handrails, bathrooms, door knobs).
- CDC guidelines on "[Cleaning and Disinfecting Your Facility](#)" if someone is suspected or confirmed to have COVID-19 infection are as follows:
  - Close off areas used by the person suspected or confirmed to have COVID-19.
    - Responsible Parties do not necessarily need to close operations, if they can close off the affected areas.
  - Open outside doors and windows to increase air circulation in the area.
  - Wait 24 hours before you clean or disinfect. If 24 hours is not feasible, wait as long as possible.
  - Clean and disinfect all areas used by the person suspected or confirmed to have COVID-19, such as offices, bathrooms, common areas, and shared equipment.
  - Once the area has been appropriately disinfected, it can be opened for use.
    - Employees without close or proximate contact with the person suspected or confirmed to have COVID-19 can return to the work area immediately after disinfection.

- Refer to DOH’s [“Interim Guidance for Public and Private Employees Returning to Work Following COVID-19 Infection or Exposure”](#) for information on “close or proximate” contacts.
  - If more than seven days have passed since the person suspected or confirmed to have COVID-19 visited or used the facility, additional cleaning and disinfection is not necessary, but routine cleaning and disinfection should continue.
- For retail activities involving the handling of shared objects (e.g. payment devices), areas (e.g. pickup area), and/or surfaces (e.g. doors), Responsible Parties must ensure that such areas and objects are cleaned and disinfected daily, at a minimum.
- For retailers providing equipment or goods for rent or providing repair services (e.g. sports equipment rentals), the equipment or goods must be cleaned and disinfected before pickup by a customer and after a customer drops-off or returns the equipment or goods.
- For retailers providing cleaning services (e.g. in-home cleaning), all equipment (e.g. vacuums, buckets) must be sanitized between each use and location.
- For businesses providing laundry services (e.g. laundromat, dry cleaner), Responsible Parties should follow CDC guidance [“Cleaning and Disinfecting Your Facility”](#):
  - Items should be laundered at the warmest appropriate water setting and dried completely.
  - Do not combine customers’ laundry.
  - Dirty laundry should not be shaken.
  - Clean and disinfect equipment (e.g. hampers, scales, bags) after each use.
- For business providing laundry services, Responsible Parties should designate a specific area for customers to place items to be laundered. If the designated area is indoors, Responsible Parties should, when practical, clean and disinfect the designated area after each use.
- Responsible Parties must require that employees practice hand hygiene by washing hands for 20 seconds with soap and water after handling laundry or cleaning and disinfecting rented or repaired equipment or homes from individual customers.
- Responsible Parties must prohibit shared food and beverages among employees (e.g. self-serve meals and beverages), encourage employees to bring lunch from home, and reserve adequate space for employees to observe social distancing while eating meals.

### **C. Phased Reopening**

- Responsible Parties are encouraged to phase-in reopening activities so as to allow for operational issues to be resolved before production or work activities return to normal levels. Responsible Parties should consider limiting the number of employees, hours, and number of customers available to be served when first reopening so as to provide operations with the ability to adjust to the changes.

### **D. Communications Plan**

- Responsible Parties must affirm that they have reviewed and understand the state-issued industry guidelines, and that they will implement them.

- Responsible Parties should develop a communications plan for employees, visitors, and customers that includes applicable instructions, training, signage, and a consistent means to provide employees with information. Responsible Parties may consider developing webpages, text and email groups, and social media.
- Responsible Parties should encourage customers to adhere to CDC and DOH guidance regarding the use of PPE, specifically face coverings when a social distance of six feet cannot be maintained, through verbal communication and signage.
- Responsible Parties should post signage inside and outside of the retail location to remind personnel and customers to adhere to proper hygiene, social distancing rules, appropriate use of PPE, and cleaning and disinfection protocols.

### III. PROCESSES

#### A. Screening and Testing

- Responsible Parties must implement mandatory daily health screening practices.
  - Screening practices may be performed remotely (e.g. by telephone or electronic survey), before the employee reports to the work site, to the extent possible; or may be performed on site.
  - Screening should be coordinated to prevent employees from intermingling in close or proximate contact with each other prior to completion of the screening.
  - At a minimum, screening must be required of all employees and visitors and completed using a questionnaire that determines whether the employee or visitor has:
    - (a) knowingly been in close or proximate contact in the past 14 days with anyone who has tested positive for COVID-19 or who has or had symptoms of COVID-19;
    - (b) tested positive for COVID-19 in the past 14 days; and/or
    - (c) has experienced any symptoms of COVID-19 in the past 14 days.
- Refer to CDC guidance on "[Symptoms of Coronavirus](#)" for the most up to date information on symptoms associated with COVID-19.
- Responsible Parties must require employees to immediately disclose if and when their responses to any of the aforementioned questions changes, such as if they begin to experience symptoms, including during or outside of work hours.
- In addition to the screening questionnaire, temperature checks may also be conducted per Equal Employment Opportunity Commission or DOH guidelines. Responsible Parties are prohibited from keeping records of employee health data (e.g. the specific temperature data of an individual), but are permitted to maintain records that confirm individuals were screened and the result of such screening (e.g., pass/fail, cleared/not cleared).
- Responsible Parties must ensure that any personnel performing screening activities, including temperature checks, are appropriately protected from exposure to potentially infectious employees or visitors entering the retail location. Personnel performing screening activities should be trained by employer-identified individuals who are familiar with CDC, DOH, and OSHA protocols.

- Screeners should be provided and use PPE, including at a minimum, a face mask, and may include gloves, a gown, and/or a face shield.
- An individual who screens positive for COVID-19 symptoms must not be allowed to enter the workplace and must be sent home with instructions to contact their healthcare provider for assessment and testing.
  - Responsible Parties should provide such individuals with information on healthcare and testing resources.
  - Responsible Parties must immediately notify the state and local health department about the case if test results are positive for COVID-19.
- Responsible Parties should refer to DOH's "[Interim Guidance for Public and Private Employees Returning to Work Following COVID-19 Infection or Exposure](#)" regarding protocols and policies for employees seeking to return to work after a suspected or confirmed case of COVID-19 or after the employee had close or proximate contact with a person with COVID-19.
- Responsible Parties must designate a central point of contact, which may vary by activity, location, shift or day, responsible for receiving and attesting to having reviewed all questionnaires, with such contact also identified as the party for individuals to inform if they later are experiencing COVID-19-related symptoms, as noted on the questionnaire.
- Responsible Parties must designate a site safety monitor whose responsibilities include continuous compliance with all aspects of the site safety plan.
- To the extent possible, Responsible Parties should maintain a log of employees and visitors who may have close or proximate contact with other individuals at the workplace or area; excluding customers and deliveries that are performed with appropriate PPE or through contactless means. Log should contain contact information, such that all contacts may be identified, traced and notified in the event an employee is diagnosed with COVID-19. Responsible Parties must cooperate with state and local health department contact tracing efforts.
- Responsible Parties cannot mandate that customers complete a health screen or provide contact information but may encourage customers to do so. Responsible Parties may provide an option for customers to provide contact information so they can be logged and contacted for contact tracing, if necessary.

## **B. Tracing and Tracking**

- Responsible Parties must notify the state and local health department immediately upon being informed of any positive COVID-19 test result by an employee at their site.
- In the case of an employee, visitor, or customer who interacted at the business testing positive, the Responsible Parties must cooperate with the state and local health department to trace all contacts in the workplace and notify the state and local health department of all employees logged and visitors/customers (as applicable) who entered the retail location dating back to 48 hours before the employee began experiencing COVID-19 symptoms or tested positive, whichever is earlier, but maintain confidentiality as required by federal and state law and regulations.
- State and local health departments may, under their legal authority, implement monitoring and movement restrictions of infected or exposed persons including home isolation or quarantine.

- Individuals who are alerted that they have come into close or proximate contact with a person with COVID-19, and have been alerted via tracing, tracking or other mechanism, are required to self-report to their employer at the time of alert and shall follow the protocol referenced above.

## IV. EMPLOYER PLANS

Responsible Parties must conspicuously post completed safety plans on the premises of the workplace. The State has made available a business reopening safety plan template to guide business owners and operators in developing plans to protect against the spread of COVID-19.
