

# HARD-TO-COUNT CENSUS TRACTS IN MONROE COUNTY, NEW YORK

In the 2010 decennial census, **81.4% of Monroe County's households mailed back their questionnaire, requiring more costly and difficult in-person follow up from the Census Bureau to count the remaining 18.6%.**

Based on the latest census estimates, **approximately 22% of the county's current population (or 168,287 people) lives in hard-to-count neighborhoods, shaded in light orange to dark red on the map.** (These are census tracts where almost a quarter or more households did not mail in their census questionnaire in 2010.)

Without higher self-response, more households in these and other neighborhoods in Monroe County are at risk of being missed in the 2020 census.

## Hardest to Count (HTC) Tracts in the Nation

Tracts with 2010 mail return rates of 73% or less (in the bottom 20 percent of return rates nationwide) are shaded on the map. Tracts with >73% return rate are not displayed.

Tracts counted using special Update/Enumerate method; they are hard-to-count but mail return rates not applicable

Tracts with lowest mail return rate in Monroe County
